

Defense Red Switch Network (DRSN)

Proficiency Code: A

The Defense Red Switch Network (DRSN) (formerly Multilevel Secure Voice) includes a range of assured services to C2 users and their missions in an environment of a robust and feature-rich set of capabilities. This service is provided at major C2 facilities (e.g., the National Military Command Center [NMCC] and Combatant Command [CCMD] headquarters) interconnected through a cryptographically secured network. The service is the core of a DOD Global Secure Voice System (GSVS) during peacetime, crisis, and time of conventional war by hosting national-level conferencing and connectivity requirements and providing interoperability with both DOD tactical and strategic communities.

The DRSN provides the DOD with high-quality secure voice telephone and conferencing services for end-to-end use by DOD authorized users.

Provisioning of this service is in accordance with the national security directives in support of Command and Control (C2) and crisis management mission functions.
