

## **Air Communications Squadron**

### **Proficiency Code: A**

*Air Communications Squadron (ACOMS)* is a communications support squadron that directly supports the Air Operations Center (AOC). ACOMS provides Sensitive but Unclassified Internet Protocol Data (SBU IP Data), Secret IP Data, and Top Secret/Secret Compartmentalized Information (TS/SCI IP Data) support. In addition, ACOMS provides maintenance support for many communication platforms for the AOC and our allies. Some of the systems supported include but are not limited to Theater Battle Management Core System (TBMCS), Global Command and Control System (GCCS), and Air Defense Systems Integrator (ADSI). In short, ACOMS provides direct communications support to the operational facility, Air Component Commander (ACC), and multiple agencies/service operators.
