

Commercial/Vendor Publications

Proficiency Code: A

Commercial off-the Shelf Manuals (COTS) manuals support equipment designed and manufactured for commercial use. Equipment manufacturers furnish them. COTS manuals commonly provide operating instructions, technical information for installing, servicing, and repairing an equipment item, and a parts list to assist in ordering replacement parts. COTS manuals and supplemental data approved for Air Force use are assigned a TO number, managed, referenced and used like any other TO. With the exception of flight manuals, preliminary copies of COTS manuals delivered with the supported equipment are authorized for use pending Air Force review and assignment of TO numbers.
